

BECAUSE COLOR MATTERS

Quality depends on getting the details right.
The best design and richest fabrics are wasted
if colors don't match perfectly.

The Datalog SPECTRUM™ family of solutions is an integrated suite of solutions that provides centralized control of the entire color management process worldwide.

Datalog SPECTRUM includes products for:

- | | |
|-----------------|-------------------------|
| Color Matching | Sample Conditioning |
| Quality Control | Laboratory Dying |
| Visualization | Laboratory Dispensing |
| Communication | Production Optimization |

datalog
MATCH™
Expert color matching and
recipe calculation

datalog
MAESTRO™
Correlates spectrophotometers
to an absolute standard

datalog
CONDITIONER™
For conditioning of color samples

datalog
PROCESS™
Sophisticated process optimization
and efficient recipe management

datalog
ENVISION™
Precise on-screen color
simulation software

datalog
SORT™
Intelligent shade sorting

datalog
TRACK™
Unique color communication and
digital sampling approval tool

You can take care of all the other details. Trust your color quality to Datalog.
